

Mr. Marble

Manufacturers of Cast Marble, Onyx, Granite Aquastone & Abrakstone

WARNINGS for INSTALLERS

Do not tighten excessively on installation as you may crack the gelcoat layer on the basin. Use silicone instead of top rubber washers at nesting point in basin. Use both rubber and metal washer at bottom of basin and hand tighten to seal. Lightly apply silicone to this bottom area to complete the seal.

CARE AND MAINTENANCE OF CAST MARBLE, ONYX & GRANITE

Cast marble, onyx and granite provide extremely durable, non-porous surfaces which resist staining. Care is very simple. Routine Cleaning with a soft cloth using a mild liquid detergent (EG: Ivory or Palmolive) is all that is needed to give many years of trouble -free service.

Harsh abrasive and industrial strength cleaners are not recommended.

Water temperature should not exceed 140 °F / 60 °C.

To maintain lustre and make cleaning easier, periodic applications of "Gel Gloss TM" should be applied.
